

## White mustard

# CEZANNE (bca 2)

### Variety specific characteristics

Cezanne is a late-flowering white mustard variety that stands out because of its length in combination with firmness. The variety can be sown until late.

Classification <sup>1)</sup>	Variety name	Resistance to beet cyst nematode (pf/pi value)	Ground cover speed	Lateness of flowering	Length (relative, 100 = 105cm)	Firmness	Resistance to Alternaria <sup>3)</sup>
A	Cezanne	0,1 - 0,3	8,5	8,5	102	8	7

1) Classification: A = generally recommended variety; B = limited recommended variety; N = new recommended variety  
 2) A low Pf/Pi value means a high degree of resistance.  
 3) It concerns Alternaria species that only occur on cruciferous plants. The chance of transfer of green manure to cultivated crop is only present in cabbage crops or rapeseed. Among others, beets, potatoes, onions and carrots are not in danger, because it concerns other varieties of Alternaria.
