

## Fodder raddish

# TAJUNA (double resistant - with bca 2 - and *M. chitwoodi* resistance)

### Variety specific characteristics

Tajuna is a double-resistant variety against *Meloidogyne chitwoodi*.

The variety blooms mid-early and has a good firmness.

Classification <sup>1)</sup> Variety name	Resistance to beet cyst nematode (prf/pi value)	Resistance to <i>Meloidogyne chitwoodi</i> <sup>3)</sup>	Ground cover speed	Lateness of flowering	Extent of tuber development	Length (relative, 100 = 104cm)	Resistance to <i>Alternaria</i> <sup>4)</sup>	Regrowth after late mowing
N Tajuna	0,1 - 0,3	R	7,5	7,5	8	150	6,5	6

1) Classification: A = generally recommended variety; B = limited recommended variety; N = new recommended variety.

2) A low Pf/Pi value means a high degree of resistance.

3) R = resistant to Columbia root-knot nematode (*M. chitwoodi*), relative susceptibility compared to the average of the non-resistant Radical and Siletina varieties is less than 6%.

4) It concerns *Alternaria* species that only occur on cruciferous plants. The chance of transfer of green manure to cultivated crop is only present in cabbage crops or rapeseed. Among others, beets, potatoes, onions and carrots are not in danger, because it concerns other varieties of *Alternaria*.

## Fodder radish

(*Raphanus sativus*)

### Cultivation advice for radish

Sowing time in spring	April - May
Sowing time in autumn	July - August
Seed quantity	25 - 30 kg per hectare
Fertilization	On clay soil 50 kg N per hectare

### To be used during the harvest and sowing plan of

Potatoes

Onions

Flower bulbs

Sugar beet

Carrots

Spinach

Wheat

Cabbage

### ACTIVE

**Active. Quality mark for proven green manure.**

**Guarantee for a healthy soil.**

Vandinter Semo has a solid reputation as a supplier of distinctive green manure, thanks to a successful cultivation and breeding programme. The high scores on the catalogue of varieties confirm that. The high-scoring Vandinter Semo green manure varieties have the Active quality mark. A guarantee for a healthy soil.

Only varieties grown in-house are eligible for the Vandinter Semo Active quality mark. The Active quality mark guarantees a proven active effect against nematodes, a proven active germination capacity and a seed purity of 98.5%.
